DECLARATION UNDER 37 C.F.R. § 131

Dear Sir:

WE, WILLIAM W. LEE AND JULIAN PELENUR DECLARE AND STATE THAT:

1. We are the co-inventors of the "Smart Handle" described and claimed in the above-identified U.S. Patent Application ("the Present Application").
2. We were advised and therefore believe that the Present Application was filed as a continuation-in-part of U.S. Provisional Patent Application Serial No. 60/158,686 filed October 12, 1999 ("the Provisional Application").
3. The Present Application was assigned to BEA Systems, Inc. by all of the inventors on October 10, 2000 and October 16, 2000. Exhibit A is a copy of the Notice of Recordation of Assignment document evidencing the recordation of the assignment on December 18, 2000.

4. Well prior to February 26, 1999, the claimed invention shown and described in the provisional and present applications was conceived and reduced to practice.

5. Exhibit B is a document written well prior to February 26, 1999 and contains source code for SmartHandle.java.

6. Exhibit C is a document written well prior to February 26, 1999 and contains a UML diagram describing the Object involved in the Assignee's Business Object Model, including the Smart Handle. The document is a Rational Rose Model file.

7. We further declare that all statement made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and that these statements were made with the knowledge that willful, false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful, false statements may jeopardize the validity of the application or any patent issuing thereon.

ASSIGNMENT

WHEREAS, I, as a below named inventor, residing at the address stated next to my name, am a sole inventor (if only one name is listed below) or a joint inventor (if plural names are listed below) of certain new and useful improvements in SMART HANDLE for which an application for Letters Patent of the United States of America was executed by me on the date indicated next to my name and address;

AND WHEREAS, BEA Systems, Inc. with principal offices located 2315 North First Street, San Jose, CA 95134 (hereinafter referenced as ASSIGNEE) is desirous of acquiring all interest in, to and under said invention, said application disclosing the invention and in, to and under any Letters Patent or similar legal protection which may be granted therefor in the United States and in any and all foreign countries;

NOW THEREFORE, in consideration of the sum of One Dollar (\$1.00), and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, I, as a sole or joint inventor as indicated below, by these presents do hereby assign, sell and transfer unto the said ASSIGNEE, its successors, assigns, and legal representatives, the entire right, title and interest in the said invention, said application, including any divisions and continuations thereof, and in and to any and all Letters Patent of the United States, and countries foreign thereto, which may be granted for said invention, and in and to any and all priority rights and/or convention rights under the International Convention for the Protection of Industrial Property, Inter-American Convention Relating to Patents, Designs and Industrial Models, and any other international agreements to which the United States of America adheres, and to any other benefits accruing or to accrue to me with respect to the filing of applications for patents or securing of patents in the United States and countries foreign thereto, and I hereby authorize and request the Commissioner of Patents to issue the said United States Letters Patent to said ASSIGNEE, as the assignee of the whole right, title and interest thereto;

And I further agree to execute all necessary or desirable and lawful future documents, including assignments in favor of ASSIGNEE or its designee, as ASSIGNEE or its successors, assigns and legal representatives may from time-to-time present to me and without further remuneration, in order to perfect title in said invention, modifications, and improvements in said invention, applications and Letters Patent of the United States and countries foreign thereto;

And I further agree to properly execute and deliver and without further remuneration, such necessary or desirable and lawful papers for application for foreign patents, for filing subdivisions of said application for patent, and or, for obtaining any reissue or reissues of any Letters patent which may be granted for my aforesaid invention, as the ASSIGNEE thereof shall hereafter require and prepare at its own expense;

Docket Number: THEOR 201.1 US - CAI

And I further agree that ASSIGNEE will, upon its request, be provided promptly with all pertinent facts and documents relating to said application, said invention and said Letters Patent and legal equivalents in foreign countries as may be known and accessible to me and will testify as to the same in any interference or litigation related thereto;

And I hereby covenant that no assignment, sale, agreement or encumbrance has been or will be made or entered into which would conflict with this assignment and sale.

This assignment executed on the dates indicated below.

      documentation

```

|The dotted arrow means that we code the Task interface, without using "implements". This is done, because the EJB spec discourages using "implements" in this situation. This allows for a more loosely coupled binding between interface and impl, thus giving the container more freedom on how to do things. Also, Task extends EJBObject, and we cannot both extend EJBObject and implement SessionBean at the same time!.

| An object X has a collection of objects Y by ownership. (black diamond relationship) [note that Y can be owned by either reference or value].

| We will automatically generate methods for object X to create instances of Y.
Example:

```
| Class ObjectX .... {
|
| public Y createY(YKey ykey) {
|
|     // go to Yhome
|     // create newY by primary key using ykey
|     // add new object by calling this.addY(newY)
|     // return newY
| }
|
| public Y deleteY(Ykey ykey) {
|
|     // delete from collection first
|     this.deleteY(ykey)
|     //destroy object by calling delete() on its home.
|     // Yhome destroys object
| }
|
| public void addY(Y newY);
|
| // see BankMain diagram
```

```

    fill_color    13434879
    nlines        19
    max_width     1450
    label
```

| A collection can be of many types, such as set, list, map, etc. For starters, all of our collections will be lists

| For each collection that an object owns, we will automatically generate the following methods:

```
| [assume that we have a collection of "Foo"]
|
| getAllFoo();           // returns the list
```

|<FILL IN!!>

```
